THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS** FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Cindy S. Kaplan on May 21, 2009.

The application has been amended as follows:

- In the Specification, p.17, lines 10-11, remove the sentence "A carrier wave that carries the code across a network is another example of a computer-readable medium."
2. The following is an examiner's statement of reasons for allowance:

With regard to claims 4,22,34,52,65,67,69, the prior art of record fails to anticipate or make obvious a method for operating *a first path computation element in a first autonomous system* to participate in establishing an inter-autonomous system MPLS Traffic Engineering LSP between a head-end node and a tail-end node, comprising: "receiving virtual shortest path tree information from *a second path computation element in a second autonomous system*, said virtual shortest path tree

information identifying a virtual shortest path tree rooted at said tail-end node and extending to one or more border routers *linking said first autonomous system and said second autonomous system*; performing computations based on said received virtual shortest path tree information to determine a revised virtual shortest path tree, said revised virtual shortest path tree extending from said tail-end node to one or more border routers *linking said first autonomous system and a third autonomous system*; and sending information identifying said revised virtual shortest path tree *to a third path computation element in said third autonomous system ... wherein said revised virtual shortest path tree is used to compute a path of said MPLS Traffic Engineering LSP between said head-end node and said tail-end node.*"

Wu discloses path selection procedure by receiving a request including information of the source and destination nodes and determine the lowest common ancestor hierarchical routing domain of the source and destination nodes in a bottom-up manner.

With regard to claims 8,26,38,56,66,68,72, the prior art of record fails to anticipate or make obvious a method for operating a *first path computation element in a first autonomous system* to participate in establishing a MPLS Traffic Engineering LSP *from a head-end node in said first autonomous system to a tail-node in a second autonomous system*, comprising: "receiving at said first path computation element, a *path computation request from said head-end node*; transmitting at said first path computation element, said path computation request to a *second path computation*

Art Unit: 2619

*element in a third autonomous system bordering said first autonomous system; and thereafter receiving at said first path computation element, virtual shortest path tree information from said second path computation element, ... wherein said virtual shortest path tree information is used to compute a path of said MPLS Traffic Engineering LSP from said head-end node [in said first autonomous system] to said tail-end node [in a second autonomous system]."*

With regard to claims 13 and 43, the prior art of record fails to anticipate or make obvious a method for operating *a first path computation element in a first area* to participate in establishing a MPLS Traffic Engineering LSP *from a head-end node in said first area to a tail-end node in a second area*, comprising: "computing at said first path computation element a virtual shortest path tree rooted at said head-end node and extending to one or more *border routers connected to said first area to a third area*; and sending information identifying said virtual shortest path tree from said first path computation element to *a second path computation element operating on a border router connected in both said third area and said second area*; wherein said virtual shortest path tree information is used to compute a path of said MPLS Traffic Engineering LSP from said head-end node to said tail-end node." The first area borders the third area, and the third area also borders the second area.

With regard to claims 16 and 46, the prior art of record fails to anticipate or make obvious a method for operating *a first path computation element connected in a first*

Art Unit: 2619

*area and a second area to participate in establishing a MPLS Traffic Engineering LSP from a head-end node in a third area to a tail-end node in said first area, comprising: "receiving at said first path computation element, information identifying a virtual shortest path tree rooted at said head-end node and extending to one or more border routers connected in both said third area and said second area; performing at said first path computation element, computations to extend said virtual shortest path tree through said second area and said third area; and identifying at said first path computation element, a path for said MPLS Traffic Engineering LSP based on said extended virtual shortest path tree."* The path from head-end node in third area to tail-end node in first area is through the second area.
